

TRIED AND TRUE WEIGHTLOSS

Care Chapter™ Options

Each Care Chapter™ provides 28 days of medication management and provider oversight.
Choose the level of support that best fits your treatment stage and needs.

TTW FlexCare™ Care Chapter 28-Day High-Access Concierge Coverage	TTW SteadyCare™ Care Chapter 28-Day Streamlined Coverage
Best for Clients starting, increasing, changing, or closely managing a regimen.	Best for Established clients who are stable on an approved dose or dose range.
Provider access Higher provider access with regular check-ins and closer support throughout the 28-day Care Chapter.™	Provider access Routine communication by email. Messages are generally answered within 2-3 business days, excluding weekends and holidays.
Dose and schedule changes Flexible dose, timing, and frequency changes when clinically appropriate.	Dose and schedule changes Set dose or limited dose range. Changes may require a separate paid follow-up.
Medication planning Proactive supply tracking, refill planning, and support as the regimen changes.	Medication planning Limited medication and refill planning. The client tracks supply and requests future orders early.
Follow-up care Routine follow-ups and care planning are included during the covered period.	Follow-up care SteadyCare™ includes one required follow-up about every three months. Extra visits are paid separately.
Wellness services May include selected wellness benefits, booster credits, or IV services based on the chosen package.	Wellness services Wellness injections, IV hydration, and added services are scheduled and paid for separately.
Price Full pricing reflects concierge access, active tracking, flexible planning, and added support.	Price Lower price for each 28-day Care Chapter™. Semaglutide: \$25 less Tirzapatide: \$50 less Compared with the matching FlexCare™ medication and dose tier.

Important for Both Options

- Medication is ordered based on the approved regimen, expected use, current supply, and available pharmacy options.
- Clients must complete required payments and visits, report changes, pick up medication on time, and follow the prescribed plan.
- The pharmacy-labeled expiration or beyond-use date does not restart when medication is picked up. Delays do not automatically extend coverage or guarantee a newer vial.
- TTW may require an earlier review or higher level of care when symptoms, safety concerns, or treatment changes need closer monitoring.
- Email is not monitored for urgent concerns. Urgent or severe symptoms should be directed to urgent care, emergency services, or 911.

Which Care Chapter™ feels like the best fit for you?

Your answer will not change your plan today. TTW will review your needs with you and confirm any future plan, pricing, or transition before changes are made.
